

In order to organize a summer student internship at the Institute of Physics PAS (duration up to 1 month), contact the head of the laboratory where you would like to work. After the manager agrees to supervise the internship, the student receives documents of agreement, internship program and consent to the processing of personal data, which must be completed and signed by the apprentice himself, his tutor, the Director of the Institute of Physics PAS and the Dean of the University Faculty (or a person authorized by him / her). The student should also provide a referral from the university for an internship at the Institute of Physics PAS. The trainee is obliged to comply with the regulations, which are included in the agreement. Detailed rules for the organization and course of the internship will be determined by agreement between the parties to the agreement, before the internship begins. After completing the internship, the student will receive a relevant certificate from the institute.

We also encourage you to browse the list of current doctoral projects of the Institute of Physics of the Polish Academy of Sciences, which will be implemented as part of the "Warsaw 4PhD" Doctoral School:
